

2019 Fall Living Covers Planted in Fallow Ground

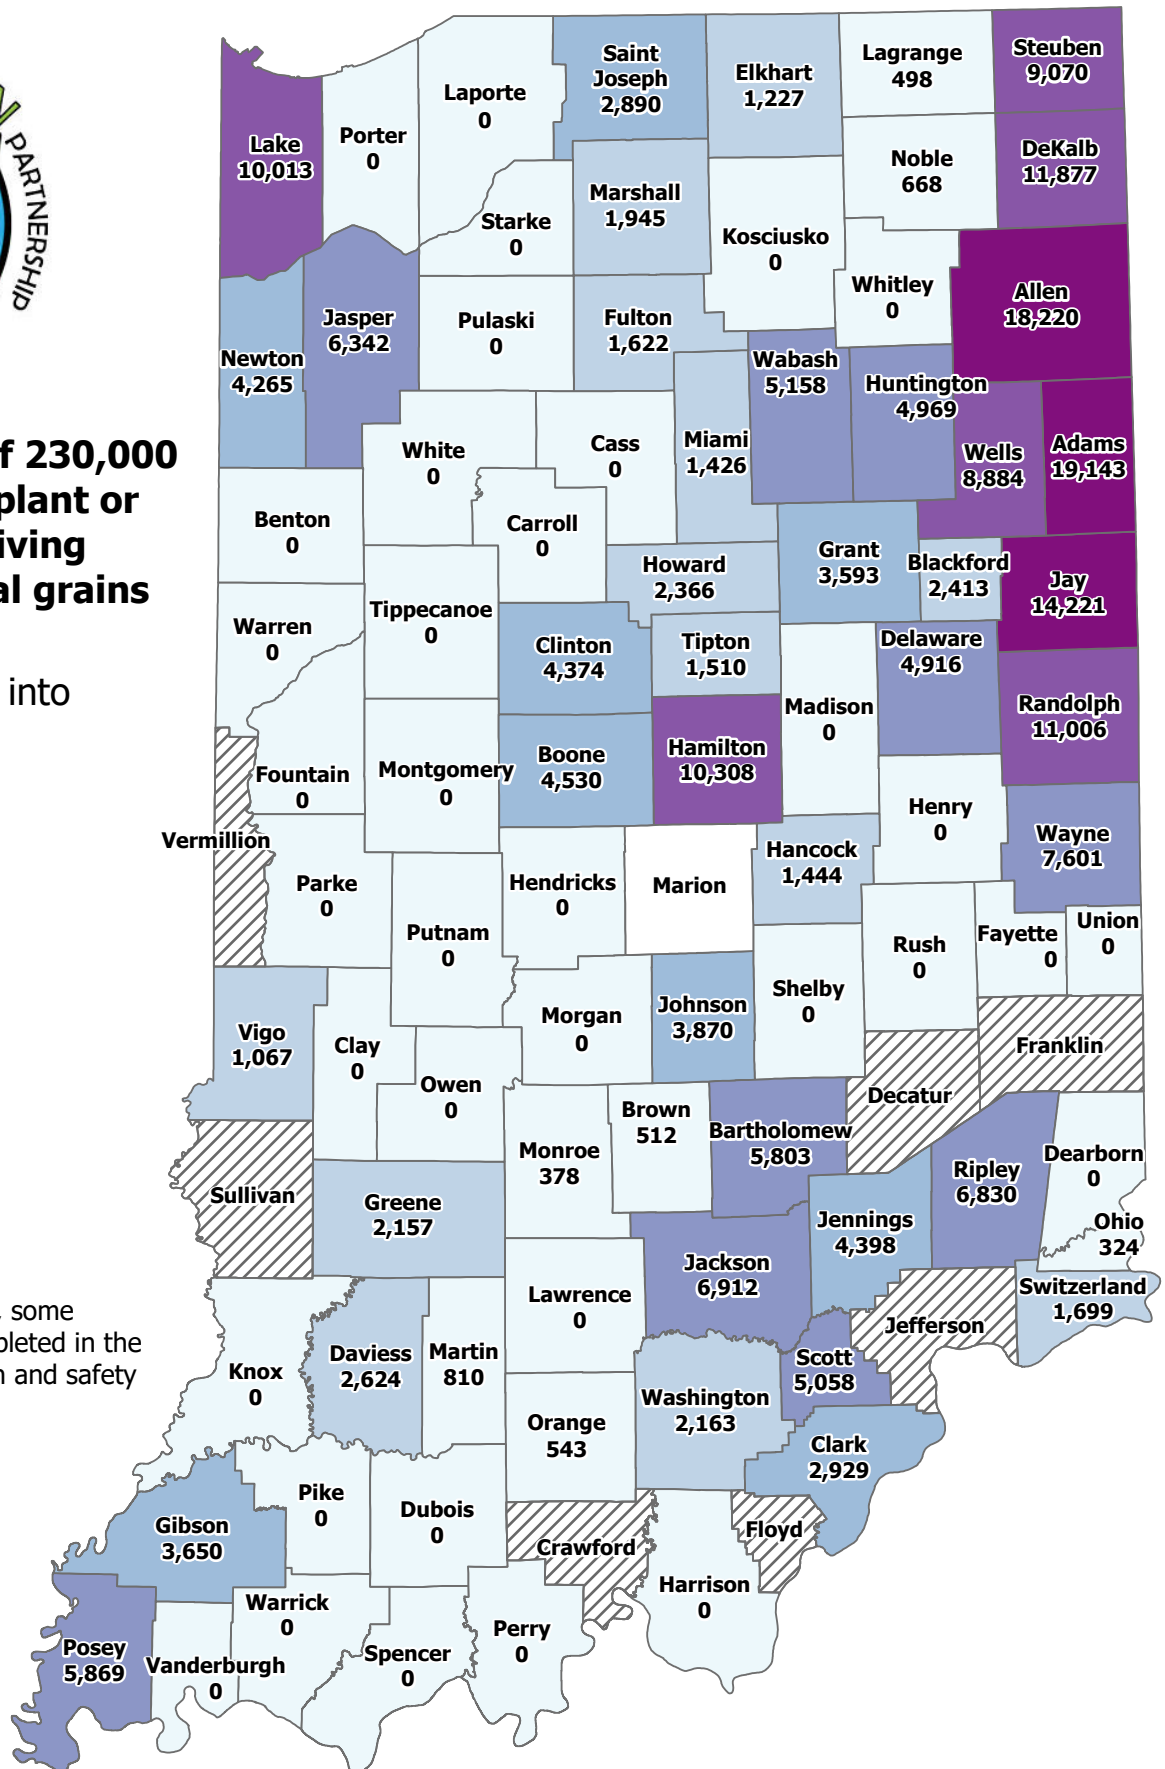

Statewide, a total of 230,000 acres of prevented plant or fallow ground had living cover crops or cereal grains planted into them.

Living covers planted into fallow ground (acres)

Due to the COVID19 pandemic, some transect surveys were not completed in the interest of protecting the health and safety of our conservation partners.

Cropland acreages calculated from 2019 NASS Cropland Data Layer.

*Windshield surveys were conducted between November 2019 and April 2020, and therefore do not reflect residues that are disturbed outside of said timeframe. See SPRING tillage transect results at <https://www.in.gov/isda/2383.htm>
